SEASONAL FORECAST OUTLOOK FOR NORTH AFRICA

March-April-Mai 2020 issued February 2020

Seasonal forecast outlook for North Africa RCC domain is based on the ARPEGE-Climat coupled model output jointly with seasonal forecasts issued from ECMWF, UK Met-Office and IRI. The ARPEGE-Climat v5.2 coupled model is running at MAROC-METEO super-computer each month to elaborate seasonal ensemble forecasts. Sets of 27 forecasts are initialized by 9 atmospheric analysis, taken from ECMWF database, and 3 ocean analysis (PSY2G3R4) issued from MERCATOR center.

We also try to exploit the sources of predictability contained in the sea surface temperature (SST) by statistical methods when it is possible. We note, however, that this influence is not the same from one region to another or throughout all the year.

NB:

- 1. New: Multi-model probabilistic forecasts from Copernicus C3S and WMO LC-LRFMME*
- 2. All dynamical forecasts are experimental.*

SYNTHESIS

The analysis of current circulation, sea surface temperature, ENSO phenomenon and dynamical/statistical models outputs show probably for March-April-Mai 2020:

- For temperature:
 - ▣ Probably normal to above normal conditions over Morocco and Algeria.
 - ▣ Probably above normal conditions over Tunisia, Libya and Egypt
- For precipitation:
 - ▣ Probably normal to below normal conditions over northern Morocco.
 - ▣ No special scenario elsewhere.

NB: Precipitation forecasts are given for September to May (the main rainy season). Temperature forecasts are given for January to December.

TABLES SUMMARIZING SEASONAL FORECAST MARCH-APRIL-MAI 2020

I. Seasonal Temperature Forecast

Model/multi-model	Morocco	Algeria	Tunisia	Libya	Egypt
<i>ARPEGE-Climat</i>					
<i>ECMWF</i>					
<i>UK Met-Office</i>					
<i>C3S</i>					
<i>LRF-NMME</i>					
<i>IRI</i>	 N  Elsewhere	 E&S  Elsewhere	 Almost Tunisia	 W&E  Elsewhere	 Almost Egypt
Synthesis	Probably normal to above normal conditions	Probably normal to above normal conditions	Probably above normal conditions	Probably above normal conditions	Probably above normal conditions

Legend

N: North; S: South; W: West; E: East; C: Center; ATL: Atlas

II. Seasonal Precipitation Forecast

Model/multi-model	Morocco	Algeria	Tunisia	Libya	Egypt
ARPEGE-Climat	 NW  Elsewhere				
ECMWF	 C&S  Elsewhere				
UK Met-Office				 Almost Libya	
C3S	 NW  Elsewhere				
LRF-NMME	 NW  Elsewhere				
IRI	 NE  C&S  Elsewhere	 NE  Elsewhere	 Almost Tunisia	 Almost Libya	 NE  Elsewhere
Synthesis	Probably normal to below normal conditions over the North. No special scenario elsewhere	No special scenario elsewhere	No special scenario elsewhere	No special scenario elsewhere	No special scenario elsewhere
